

17 MAR 2019

WELCOME TO MEET SANSOX IN WATER PHILIPPINES EXPO 2019

Water Philippines Expo is the leading international water related exhibition and it is the biggest business-to-business show in the Philippines with 500+ exhibiting companies & brands. They say that gathering of all water professionals “serves as an important forum for awareness on the latest trends and technologies, and also developing the best practices and solutions for existing water and environmental concerns.” There will be also a conference and technology seminars, not to mention a specific expert dialogue in the program.

Welcome to see and talk about SansOx aeration and dissolving applications, which are excellent for several needs in water purification and treatment, aquaculture, and restoring of natural waters. You can get familiar with e.g. OxTube and ClariOx systems. Our applications are most energy efficient, need little space and function mostly in tubes.

SansOx will participate in Water Philippines Expo 2019 Exhibition on the Unique Water stand. Unique Water are a big actor in the Philippines and organize a large stand with versatile products.

The Expo will be open on March 20-22 at the SMX Convention Center, Pasay City.

SansOx will be represented by our COO, Jukka Hakola. Unique Water stand is located at N01.
