SANSOX WAS CHOSEN TO TOP 25 IN NORDIC CLEANTECH OPEN COMPETITION IN 2017

Cleantech Scandinavia promotes annually Nordic start up cleantech companies by this contest.

This is what they say on their web site, e.g.:

"The Nordic Cleantech Open aims to strengthen the pipeline of new innovative cleantech startups in the Nordic region. In each cycle, the Top 25 most promising companies are chosen by our jury, here you can learn more about them! After our annual massive sweep of the Nordic innovation environment to find the most exciting and progressive start-ups around, we ended up with an impressive bunch of close to 100 companies."

The 25 candidate companies and their novelties are presented shortly there, too.
